SKILLS

PHP, Mysql, NoSql, MongoDB, css, html, javascript, bootstrap, jquery, firebase, aws, cpanel, laravel, codeigniter, Angularjs, nodejs, expressjs, Flutter, Git.

EXPERIENCE

Kolkata- Sr Developer and technical executive.

JUNE 2018 - PRESENT

- I have been with this firm from its birth.
- Managing the technical team seems really fascinating for me here.

Kolkata - Physics content editor.

August 2018 - September 2018

- Had to join this internship to learn about content and its effectiveness towards business.
- Worked there on Physics content as I love physics and technology.

EDUCATION

Ghousia college of engineering, Bangalore - B.E (mechanical)

August 2015 - January 2021

Yes, I did mechanical engineering but I created interest in Computer science development after 2nd year when I was in year back. I am also the team leader of a NAIN project group where we are creating a harvesting robot.

For me education should never be for certificates and degrees.

PROJECTS

KKHD - *Website as well as android application.(kolkata)*
(currently inactive)

- This was an entertainment platform where students will be able to learn music nationwide.
- Mobile application was built for the same purpose.

TAXATIONHELP- *Firm that handles legal matters for a business.(Delhi)*

www.taxationhelp.in

- Only the content creation backend was created.
- Content development.

*I have also worked on miscellaneous tasks from international clients.

MISCELLANEOUS

I have been a tech geek from an early age. I love research and development in any technical field. I am really specific to work. I just focus on the end product even if I have to think out of the box.
